Audit

Audit and Assurance Services

Our services can strengthen your business and stakeholders' confidence. You'll receive professionally verified results and insights that help you grow.

At Grant Thornton we offer more than just auditing. With personalised attention and domestic and local market knowledge, from Partners and Managers, we offer understanding and provide insights that help businesses succeed.

We believe it to be of paramount importance to add value to our audit. Indeed, the very culture of Grant Thornton and the demands placed upon us by our Client base is all about challenging the way our Clients operate and bringing a different and independent perspective and input to their businesses.

The Grant Thornton audit process gives us a thorough understanding of our Client's business and requires us to assess the business risks and control systems, which puts us in a unique position to add value to your Company.

We are highly experienced in managing audit assignments. All of our auditors use common audit systems based on our GTI Horizon approach. We believe that success will only be delivered through having a close working relationship with your accounting team and through careful, well-instituted planning, in order to promote understanding and buy into our common goals and timetables.

Our Audit and Assurance services include:

- 1 Statutory audit
- 2 IFRS services
- 3 Review of financial statements and financial information
- 4 Reporting accountant
- 5 Compilation of financial information
- 6 Cross-border audit
- 7 US GAAP audit

Audit Quality

Partner led

The Audit Partners will lead from the front throughout the audit cycle, taking full responsibility for the quality of our audit services.

Risk focused

We will focus on areas of greater risk in your business. Issues are identified and addressed at an early stage.

Highly automated

We adopted Horizon - an innovative audit approach, via the use of our audit software Voyager and supplementary software Tbeam and Pentana Checker. This enables the audit team to generate audit programs that are tailored to client specific situations and focused on the identified risk areas. This approach helps to deliver more extensive and proactive advice.

Tax Services

Market entry

We have advised numerous new foreign investors on efficient tax structures. Including investment advisory of international business models and appropriate business structures in Vietnam, assistance in licensing and post licensing. We also provide advisory services on governance, tax and regulations for business structures in Vietnam. Our experience allows you to consider all the options and set up a corporate structure that meets both operational and tax efficiency requirements.

Licensing services

Vietnam regulations frequently have significant changes to facilitate the economic development. We designed the licensing service to assist foreign investors and Vietnamese locals, as well, in establishing the appropriate business model for a legal presence in Vietnam. Our licensing services will be a part of our foregoing market entry services, including assistance in preparing the application dossiers and working with the licensing authorities to obtain the approval for the legal presence of clients both in Vietnam and overseas.

Tax due diligence

We conduct tax due diligence reviews of target companies to analyse their tax exposure and position in relation to acquisitions, mergers or consolidations. We are able to integrate this service with our Advisory Services team in order to offer a comprehensive, holistic due diligence review.

Tax advisory on business model and transactions

We will review the proposed business model and transactions and advise on tax implications and recommendations to optimise the tax opportunities under the local regulations and treaties which Vietnam has entered into. Furthermore, we coordinate with our Grant Thornton global tax team to provide a comprehensive tax advisory for the countries involved in the business model and transactions.

Tax

Tax Services

Tax compliance services

This service is designed to assist enterprises to cope with the statutory tax declaration requirements in line with the Vietnamese tax laws, as well as the frequent changes and updates in tax laws.

A specified engagement team of tax professionals will be dedicated to each of our clients so as to fully understand the enterprises' business operations. We will act as your internal tax person/team to advise the Management on tax treatments on daily business operation, handle tax returns and work closely with your accounting personnel to ensure the Company's tax declarations are in line with the laws.

Our scope will cover all taxes related to your business, which will include but not be limited to the assistance in preparation of tax returns for Value Added Tax, Corporate Income Tax, Foreign Contractor Tax and Business Registration Tax on a monthly, quarterly, annually basis.

International tax planning

Our extensive international network provides us with significant resources to meet all your expansion goals. We strive to develop commercially focused and tailored tax strategies to minimise tax exposures and maximise business efficiency. We utilise our extensive local knowledge and proven tax-efficient strategies to maximise potential benefits and reduce risks. We use these techniques to assist you in planning your legal structure, repatriation planning and exit strategy. In summary, we focus on designing appropriate tax effective structures, to help achieve an integrated tax minimisation plan.

Expatriate tax planning

We have a broad knowledge base and skills to assist you keep your personal income taxes to a legitimate and reasonable level, while remaining compliant with legislation. We can develop a personalised package for each key employee to take maximum advantage of the exemptions and incentives available.

Tax Services

Tax health check

Our Tax Health Check involves a high-level review of specific tax areas to highlight the key issues that need to be rectified in order to reduce tax risks. Through our extensive experience, we have identified key risk areas in which many enterprises are not fully compliant or often overlook potential tax planning opportunities. Our tax health check service represents a cost-effective method to proactively manage risks and reduce potential issues arising as a result of a tax inspection.

Customs and Trade

In the context of increasing number of FTAs leading to tariff reduction, Vietnam customs authorities are aggressively reinforcing customs regulations in order to retain balancing state budget recollection. In responding to that increasing tension, our customs and trade experts will be available to help you handle efficiently customs and trade compliance and advisory matters. The key supports may cover handling mismatches of imported materials for export and processing, product classification, customs health check and audit support, customs ruling and controversy as well as other customs planning advisory.

Global mobility services

Vietnamese and international regulations concerning tax and social security contributions are constantly changing. When a company plans to transfer personnel from one country to another many questions arise concerning the tax and labor consequences in both the home country and the host countries. On the other hands, when a company in Vietnam recruits a foreigner, there are a number of tax, labor issues needed to be considered before entering the labor contract with the foreigner.

We're big enough to solve the most complicated assignments, but small enough to serve you in the way you want. Nothing about what we do is 'one size fits all'. Instead, our approach is to spend quality time to understand your needs and design a service that's right for you.

Transfer pricing

Planning:

Transfer pricing planning gives all-round consideration to commercial viability, tax efficiency and transfer pricing compliance. It allows you to be confident that your transfer pricing policy and practices integrate well with your broader operational and tax considerations.

Risk assessment:

Analyse and locate your existing and potential Vietnam transfer pricing risks taking into consideration the business and transactional model, price setting, function and risk (FAR) profile, and recommendations for improvement.

Economic analysis:

A benchmarking study establishes an appropriate arm's length price by reference to comparable transactions or profit outcomes of independent companies with similar transactions and in similar conditions to the tested entity. It is an essential element of contemporaneous documentation and a crucial support to identify the re-assessed prices to be disclosed in annual Transfer Pricing filings. Powerful competitive market insights can also be achieved.

Transfer Pricing compliant documentations:

Currently, the applicable Vietnamese TP regulations, being Decree 20 and Circular 41, requires taxpayer to prepare the TP Disclosure Forms (i.e. Forms 01, 02, 03 and 04) and submit such materials together the Corporate Income Tax ("CIT") finalisation return. In addition, the following TP documentation package also required to be prepared in Vietnamese on an annual basis and before the finalization date of the CIT return:

- local File;
- local compliance-oriented Master File (a file containing information relevant for global corporations) following the checklist mandated in Form 03; and
- duplicate copies of Country-by-country report from the ultimate parent company.

With an aim to fully comply with the Vietnamese regulations as well as to mitigate any potential tax exposures, our TP team has a broad knowledge base, experience as well as skills to provide you with our TP compliance services. Accordingly, we assist you in preparation of mentioned TP compliant documentations based on your demand and actual operations.

Particularly, for the preparation of TP Disclosure Forms, we will support in reviewing/ collating relevant accounting figures and performing the benchmarking support to identify the arm's length prices for disclosure on the Forms. For the preparation of TP documentation package, such documentation analyses and supports related party transactions that might help avoid tax adjustment and penalties. Accordingly, it is important to clearly document that the arm's length principle is being followed, and how pricing decisions have been made for such transactions.

Dispute resolution:

Supports companies subjected to transfer pricing audits. This is achieved by preparing defense packages and negotiating with the tax authorities, instilling confidence and removing any confusion around your transfer pricing position.

Transaction Advisory Services

Mergers & acquisitions

Globalisation and company growth ambitions are driving an increase in M&A activity worldwide as businesses look to establish a footprint in countries beyond their own. Even within their own regions, many businesses feel the pressure to acquire in order to establish a strategic presence in new markets, such as those being created by rapid technological innovation.

Grant Thornton Vietnam can provide clients, either a buyer or a seller with advice and support involved in all elements of a transaction, be it a sale, an acquisition, valuation, the raising of external debt or private equity or accessing global capital markets.

We have significant experience advising clients on transactions in all regions of the world. Our teams provide expert advice in the following areas:

Buying a business:

For businesses looking to grow by acquisition, our corporate finance advisory team will take a hands-on approach to helping you find the perfect match to achieve your business objectives.

Selling a business:

If you are considering selling your business or exit from a business, you want to be sure of achieving the highest possible value and a smooth sales process. Our corporate finance team draws on the expertise of other technical specialists within our firm wherever necessary to deliver a complete service that covers every aspect of the sales/exit process, achieving desired strategic outcome.

Transaction support

Transactions are significant events in the life of a business – a successful deal that can have a lasting impact on the future shape of the organisations involved. Because the stakes are high for both buyers and sellers, experience, determination and pragmatism are required to bring deals safely through to conclusion.

We have significant experience of advising clients on all aspects of buying and selling a business. Our teams provide expert advice in the following areas:

Exit readiness:

Prospective purchasers will require comfort in numerous areas, many of which will ultimately have a bearing on the transaction price. We work with vendors to plan, anticipate and explain these areas, and enhance business value through operational improvements 12 – 18 months before a disposal in order to present the business ready for sale. The timely disclosure of transaction issues helps protect shareholder value.

Financial due diligence:

We provide robust financial due diligence services that are clearly linked to our clients' requirements as purchasers, and also suitable for their funders.

Commercial due diligence:

We deliver thoughtful, robust advice based on primary and secondary research combined with quantitative analyses and focus on the key issues that impact value.

Operational and IT due diligence:

Our specialist technology advisers help public and private sector organisations, agile SMEs and private equity investors achieve maximum value from their technology and IT operations. They also advise clients on how to optimise the use of technology and IT capital.

Deal structuring:

Our transaction tax specialists work closely with our corporate finance team to ensure you have a full picture of the tax implications of your deal. Our team is highly experienced in understanding deal dynamics and establishing effective tax structures. Our extensive work with mid-market clients means we understand the personal tax planning needs of business owners and reflect these in our tax structuring solutions.

Advisory

Valuation Services

Valuations

For organisations involved in a transaction or a dispute, or embarking on a restructuring, the value of the business involved and its assets will be an important commercial consideration. A robust and reasoned opinion on value is essential. For litigants, a professional valuation is often the key to securing a fair settlement.

Our valuation team has extensive industry knowledge, international reach and technical expertise. Our specialists provide expert advice in the following areas:

Transactions:

An independent view on value for mergers, acquisitions, restructuring and proposed financial structures, delivering robust advice within the constraints placed by the deal deadlines.

Tax:

Our team provide third-party valuations to enable directors to meet their fiduciary duties and to support proposed tax treatments.

Financial reporting:

We assist on regulatory and accounting matters, with advice on valuations required by Accounting Standards, including purchase price allocation, impairment testing and valuation of financial instruments including share options and other derivatives.

Dispute resolution:

We offer dispute resolution services and work with forensic investigators, providing valuation advice within the field of dispute resolution, litigation support and expert valuations.

Fund administration:

Our specialists provide third-party valuations for investment funds to support periodic reporting of net asset values or to enable the transfer of assets.

Valuations to support asset-backed lending decisions:

We provide valuations to support asset-backed financing, including valuing shares and intangible assets, and provide periodic valuations of assets to confirm that the terms of the loan agreement continue to be met.

Business Risk Services

Internal Audit

Internal audit is about much more than compliance. It's critical to good governance and business performance. It provides confidence to manage key risks, informs good decision making and improves organisational performance.

A good internal audit evaluates and improves your risk management controls; reviews governance processes and procedures, and assesses your organisation's key functions and support services to ensure your business goals are supported effectively and your regulatory responsibilities are met. Greater efficiencies, aligned to your core business objectives, ultimately reward your bottom line.

Our internal audit services provide you with the independent and objective support you need in designing, implementing and operating your controls effectively.

Outsourced internal audit

We can work with you to assess your enterprise risks, identify the areas of greatest vulnerability, and develop appropriate work plans and audit programs to mitigate these risks. Our outsourced internal audit solutions are flexible:

- assess your audit requirement
- developing an internal audit charter
- generating an internal audit strategy
- delivering and reporting on internal audit reviews
- running your full internal audit function

Co-sourced internal audit:

If your department lacks the breadth of specialist skills or you require additional resources at peak times, we can cross-post our staff to complement your internal audit function. Our co-sourced service provides:

- project management expertise
- access to subject matter experts in human resources; performance improvement; fraud and corruption assessment and investigations
- experienced internal auditors who require minimal supervision

Internal audit transformation

Grant Thornton's internal audit effectiveness and improvement reviews will help to assess and improve your internal audit function. Our reviews deliver real value through:

- benchmarking against current best practices
- productivity and value-for-money assessments
- pragmatic advice on improvements
- assurance to Boards and Audit Committees that your internal audit function focused resourced and managed effectively

Risk Management

Effective risk management gives companies the confidence to act on future business decisions. Our risk management offering helps you develop or enhance your organisation's approach to risk management, to the point where it is successfully embedded in the organisation. This includes:

- assessing risk management frameworks
- conducting enterprise-wide risk assessments
- development of risk policy frameworks and risk appetite statements
- assisting you to embed effective monitoring and control processes
- risk culture assessments
- risk maturity assessments

Internal Control and Process reviews

All businesses must change and evolve to remain competitive but if your control environment doesn't adapt, the risk of failure grows. It's essential to ensure your processes, systems and controls enhance value, rather than dilute it.

With the rigorous approach, our experienced team will help you identify and understand the risks inherent in key processes and whether your existing controls are adequate and efficient in mitigating those risks. Our solutions consider the alignment of people/ organisations, technology and business processes.

- control design assessments
- efficiency & effectiveness assessments of processes
- pre & post – implementation reviews
- process documentation and manual preparation

Fraud and forensics services

We combine our highly specialised forensic accounting and digital technology team to conduct investigations involving suspected fraud, bribery, corruption and money laundering, for a range of different entities. In addition, we provide fraud risk management services to help organisations understand their exposure to the risk of financial crime.

Business Consulting Services

Working Capital Optimisation

Releasing excess levels of cash tied up in working capital represents the cheapest form of finance available to a company. CFOs are increasingly being tasked with optimising working capital performance. However, maintaining control of working capital as companies increasingly look to grow, investing in new products, international diversification and M&A activity can be extremely challenging.

To deliver a desired level of improvement requires an approach focused on dealing with the underlying issues, which can range from the quality and appropriateness of commercial terms through to the internal 'self-help' available through improved process and control. The breadth of operational and professional experience in our team enables us to influence parts of the wider organisation such as sales, procurement, operations and logistics who all have a major part to play in any effort to reduce working capital.

Our proven methodology drives accelerated identification of the issues with quantification of the benefit case. Potential improvements are prioritised based on value and speed to deliver, working with management to design and implement the solutions. Our services include:

- 100 day working capital and cash flow planning
- cash flow forecasting
- exit readiness
- forecast-to-Fulfil (Inventory)
- order-to-Cash (Accounts Receivable)
- procure-to-Pay (Accounts Payable)
- working capital assessment and reduction

Financial Effectiveness and Transformation

The CFO faces a continuous challenge to create (and demonstrate) value from the finance function. They must decide on the extent to which finance processes are centralised, owned locally or outsourced, striking a balance between the delivery of insights and the cost-effective management of transaction processing. Unfortunately there is no 'one size fits all' solution.

We support the CFO in assessing current practice and in building board-level understanding of, and commitment to, the business case for change. Beyond this, we work on designing and implementing solutions, ensuring that benefits can be effectively tracked and communicated. Our collaborative approach focuses on partnering with client teams to identify the root cause of problems identified as well as providing practical recommendations that are aligned across key

stakeholders to provide sustainable outcomes. Specific areas we can provide support to include:

- activity-based costing and value analysis
- benchmarking
- business process outsourcing evaluation
- finance function assessments
- finance transformation
- management reporting
- operating model design
- process mapping and optimization
- shared Service Centre set-up

Business intelligence and analytics

A well-considered analytics strategy provides invaluable insight into your organisation and can enable timely business decisions that will reflect market conditions well into the future, along with giving you the power to optimise your operations for future growth and profitability. Our work is characterised as follows:

- our end-to-end analytics services are designed to help you enhance organizational capabilities and support forecasting and forward-looking financial and customer models
- implement data programs using a full range of technology tools and applications that cover the analytics maturity spectrum
- apply advanced techniques to reveal unseen data patterns and anomalies
- deploy feasible analytics solutions in a secure, cloud-based environment with advanced data ingestion, security and governance protocols
- use industry- and client-specific knowledge and experience coupled with advanced modelling and visualisation techniques

IT advisory

We help our clients prepare themselves for cyber security threats, ensure ongoing protection, react effectively to attacks and drive change to improve their cybersecurity capability. Our IT advisory services include:

- IT due diligence
- IT security services
- network vulnerability and penetration testing
- business requirements definition and business analysis support
- IT project management support.

Digital Advisory

We recognise digital technology's crucial role in today's dynamic business environment. Expanding its offerings, Grant Thornton Vietnam is now determined to assist its clients in unlocking the potential for growth through a greater digital orientation. We have combined Digital Transformation, IT Advisory & Information Management and Analytics into a new offering, Digital Advisory.

Digital Advisory brings a fresh perspective to our clients by reimagining their businesses and services in the digital age and helps them define and implement their digital strategies.

Technology provides organisations with some of the greatest opportunities to grow and compete, such as driving innovation and expanding your company's products and services, enabling greater scale and reach, commoditising and monetising your data and enhancing profitability through improved operational effectiveness.

While technology is an enabler and enhancer for growth businesses, it does create points of risk as well, such as security breaches, budget blow-outs, challenges for your staff and management, and disruptions to your current structure and operations.

Our team works with you to design, execute and optimise your technology investments and transformation strategies. Our experts, with extensive real-world digital business experience, take a hands-on approach to delivering outcomes and solutions that align technology investments to your growth strategy.

Our Digital Advisory services include:

- 1 Digital Transformation
- 2 Digital Sales and Marketing
- 3 Digital HR
- 4 Digital Audit
- 5 Digital Project QA
- 6 Digital Security
- 7 Technology Architecture
- 8 Data and Analytics

Digital Advisory

Our advisory approach is not only to deliver, but also to lay a strong foundation for our clients to continuously enhance and improve after our delivery, to build capacity of the management team, and to raise awareness and motivation throughout the organisation concerning the importance of digital technology in modern business.

Digital Transformation

Find out how your business rates in digital asset performance—what works, what doesn't, and what's missing. Learn how to quickly build digital assets through hands-on design examples. Set up a framework to continuously improve existing digital assets and roll-out new ones.

Digital Sales and Marketing

Find out how your business rates in digital sales and marketing. Learn basic and leading-edge digital sales and marketing approaches and techniques, from paid digital marketing to guerilla growth hacking. Boost your online sales with minimal effort and maximum reach.

Digital HR

Launching a new digital business or setting up a digital center within your established business? Need to develop more digital talent and a more agile mindset? Get help with organizational structure, job descriptions, recruiting techniques, and staff retention strategies.

Digital Audit

Find out how your digital and IT systems and functions rate compared to peer businesses in Vietnam and worldwide. Address weaknesses and gaps in your digital governance. Identify, evaluate, and mitigate risks in your current digital systems and processes.

Digital Project QA

Professional help on your next digital project can reduce costs, save time, and improve outcomes. From solution selection, vendor contracting, and project organization, through to milestone confirmation and quality assurance of deliverables before the vendors are paid.

Digital Security

Find out how your business rates in Digital Security. Identify key digital security threats, and plan how to address them. Set up a comprehensive digital monitoring and management regime to address breaches if and when they occur.

Technology Architecture

Design a comprehensive, enterprise-wide, agile service-oriented, technology-neutral architecture, which can accommodate existing and future digital systems, components, and services, ensuring that data and services are securely shared across the enterprise.

Data and Analytics

Design a data architecture and identify data analytics tools to provide meaningful business intelligence to managers and operational staff when and where they need it. Improve data collection, analysis, distribution, and presentation of data with dashboards. Identify new opportunities to leverage and monetize your data.
