ERP SUITE IN A BOX
Pricing package by industry

> ❝ *Are you stuck with a current system that no longer serves your needs?* ❞
>
> Grant Thornton provides tailored NetSuite advice for cloud ERP system from a team that understand your organisation.

Power of Oracle NetSuite

NetSuite is the #1 ERP system – and for good reason. It combines ERP, CRM, HCM, SRP and eCommerce in a single, fully unified SaaS solution that connects your business across finance, sales, service and fulfilment. NetSuite is the complete web-based business management software designed to run your entire business.

Ability to suit your business

Warehousing and Distribution, Manufacturing, Professional Services, Field Services, Software Development, Charities, Financial Services – companies and organisations across all industries are realising the power of NetSuite.

Scalability

As businesses grow and evolve, so do their system requirements. NetSuite is modular, so you can add additional functionality as your company grows and changes. New NetSuite modules or "Built for NetSuite" SuiteApps allow you to add on functionality while keeping all data in one system.

NetSuite Cover	GENERAL BUSINESS	PROFESSIONAL SERVICE	WHOLESALES & DISTRIBUTION	MANUFACTURING	REAL ESTATE
